Breakout The ninth book in the Canadian Battle Series, Breakout from Juno, is the first dramatic chronicling of Canada’s pivotal role throughout the entire Normandy Campaign following the D-Day landings. On July 4, 1944, the 3rd Canadian Infantry Division won the village of Carpiquet but not the adjacent airfield. Instead of a speedy victory, the men faced a bloody fight. The Canadians advanced relentlessly against Hitler's finest armoured divisions, at a great cost in bloodshed. Initially, only the 3rd Division was involved, but in a couple of weeks two other Canadian divisions -- 2nd Infantry and 4th Armoured -- along with a Polish division and several British divisions came together as First Canadian Army. While their generals wrangled and planned, the soldiers fought within a narrow village of Carpiquet but not the adjacent airfield. Instead of a speedy victory, the men faced a bloody fight. The Canadians advanced relentlessly against Hitler’s finest armoured divisions, at a great cost in bloodshed. Initially, only the 3rd Division was involved, but in a couple of weeks two other Canadian divisions -- 2nd Infantry and 4th Armoured -- along with a Polish division and several British divisions came together as First Canadian Army. While their generals wrangled and planned, the soldiers fought within a narrow landscape extending a mere 21 miles from Caen to Falaise. The Canadians won a two-day battle for Verrières Ridge starting on July 21, costing them 1,500 casualties. More bloody battles followed, until finally, on August 21, the narrowing gap that had been developing at Falaise closed when American and Canadian troops shook hands. The German army in Normandy had been destroyed, only 18,000 of about 400,000 men escaping. The Allies suffered 206,000 casualties, of which 18,444 were Canadians. Breakout from Juno is a story of uncommon heroism, endurance and sacrifice by Canada’s World War II volunteer army and pays tribute to Canada’s veterans at a time when many Canadians, young and old, are actively engaged in acts of remembrance.

Breakout Just as the video game console market was about to crash into the New Mexico desert in 1983, professor and sociologist David Sudnow was unearthing the secrets of “eye, mind, and the essence of video skill” through an exploration of Atari’s Breakout, one of the earliest hits of the arcade world. Originally released under the title Pilgrim in the Microworld, Sudnow’s groundbreaking longform criticism of a single game predates the rise of game studies by decades. While its earliest critics often scorned the idea of a serious book...
about an object of play, the book’s modern readers remain fascinated by an obsessive, brilliant, and often hilarious quest to learn to play Breakout just as one would learn the piano. Featuring a new foreword and freshly edited text, Breakout makes a perfect addition to Boss Fight's lineup of critical, historical, and personal looks at single video games. We’re proud to restore this classic to print and share with new audiences Sudnow’s wild pilgrimage into the limitless microworld of play.

Breakout Churches This fascinating volume charts the progress of the Allied breakout of Normandy through German eyes. Beginning with Operation COBRA and ending with the offensive which led to the liberation of Paris, this critical phase of the war in the west is examined and described by senior German officers. These, from staff officers at OKW to divisional generals on the ground, critique their performance, examine Allied superiority, and evaluate their own efforts to contain Allied forces in Normandy. They look at such key events as the counter-attack at Mortain, the American offensive, British and Canadian efforts and the sequence of events that led to the fighting around the Falaise gap. The German officers originally submitted the reports presented here to Allied intelligence efforts as part of post-war debriefing sessions. The current volume, which follows on from Fighting the Invasion and Fighting in Normandy, consists of carefully selected and edited material. Fighting the Breakout gives a broad picture of German hopes balanced with the realisation that they could not hope to contain the Allied efforts for long. With supplementary material by David C. Iaby, Fighting the Breakout is a fascinating glimpse into how a defeated army sought hard to turn the tide of defeat.

Operation Breakout A theoretical treatment of sound transmission through the walls of non-circular muffler shell is done for plane mode transmission within the muffler shell. Non-circular muffler shells include distorted circular (due to the welding seam), elliptical (oval) and flat-oval shells. An analytical formulation has been developed in this thesis in order to predict the breakout noise with the acoustical and structural wave coupling phenomena. First, progressive wave model is chosen. Then, the Transverse Transmission Loss (TTL) is predicted at different frequencies of interest. This formulation is extended to the standing wave model by which results for anechoic, rigid end and open end boundary conditions are obtained. Transverse transmission loss (TTL) predicted, based on the analytical model, is compared and validated with computational results using a commercial 3D numerical simulation (vibro-acoustic) software package like SYSNOISE. Same model is used for non-circular shell with flat-oval configuration. And also breakout noise obtained from different configurations like circular, elliptical and flat-oval, all having the same equivalent radius, are compared. Finally, by incorporating effects of finite length of the muffler and end plates, analytical model has been developed for a circular shell. Parametric studies have been done wherever required to evolve the design guidelines which will be helpful for designers.

United States Army in World War II: Breakout and pursuit Northern Cheyenne Ledger Art by Fort Robinson Breakout Survivors presents the images of Native warriors—Wild Hog, Porcupine, and Left Hand, as well as possibly Noisy Walker (or Old Man), Old Crow, Blacksmith, and Tangled Hair—as they awaited probable execution in the Dodge City jail in 1879. When Sheriff Bat Masterson provided drawing materials, the men created war books that were coded to avoid confrontation with white authorities and to narrate survival from a Northern Cheyenne point of view. The prisoners used the ledger-art notebooks to maintain their cultural practices during incarceration and as gifts and for barter with whites in the prison where they struggled to survive. The ledger-art notebooks present evidence of spiritual practice and include images of contemporaneous animals of the region, hunting, courtship, dance, social groupings, and a few war-related scenes. Denise Low and Ramon Powers include biographical materials from the imprisonment and subsequent release, which extend the historical arc of Northern Cheyenne heroes of the Plains Indian Wars into reservation times. Sources include selected ledger
drawings, army reports, letters, newspapers, and interviews with some of the Northern Cheyenne men and their descendants. Accounts from a firsthand witness of the drawings and composition of the ledgers themselves give further information about Native perspectives on the conflicted history of the North American West in the nineteenth century and beyond. This group of artists jailed after the tragedy of the Fort Robinson Breakout have left a legacy of courage and powerful art.
