This aggressive marketing approach is characterised by creative and legal attacks targeted on competitors in order to maintain or increase awareness and impact to the customer. Guerrilla marketing stands for focusing on conventional goals such as profit or growth, but doing it by using exceptional promotional approaches, like advertising in yellow pages, wild postings or non-traditional outdoor advertising media vehicles. Customers are confronted with an increasing amount of advertising messages per day and therefore organisations have to develop advertising approaches to stand out in today's media fragmentation. Especially small and medium-sized enterprises are having greater internal limitations regarding a restricted budget for marketing communications and facing bigger external uncertainties than large organisation. Thus, marketing campaigns have to become profitable for an enterprise. The low-cost communication effort is one of the major issues for guerrilla marketers. It is particular relevant for a small company to apply a differentiated set of promotional methods to diversify itself from competition, but guerrilla marketing is also becoming more adopted by large enterprises. This dissertation aims to give the reader a complementary insight of guerrilla marketing and investigates its relevance for a small and medium-sized enterprise (SME) in terms of generating profit. The purpose of this study is to identify how relevant this approach is to guerrilla entrepreneurs in small organisations, regarding profitability.

Does this sound familiar? You've tried to grow your business but have produced less-than-desired results. You've learned that your working capital, cash flow, financial ratios, and overall profitability are insufficient to afford the costs of needed sales, marketing, and promotional strategies typically called for to find and develop new customers, markets, and products. It’s very common that company executives do not follow generally accepted basic business practices such as knowing product costs and margins, obtaining strategically useful information about customers, conducting market research to identify prospective customers, and understanding competitors' advantages and disadvantages needed to build effective growth strategies. Based on 21 case studies and 126 reviews of manufacturers’ sales and marketing practices, this book explains the common pitfalls so many companies experience, and it offers common sense, practicable, and affordable step-by-step “how to’s” for cost and profitability analyses on products and customers. It will help you find prospective new customers, conduct smart market research, and decipher and use competitor intelligence. It also provides guidelines for determining the best combination of sales coverage for inside/outside sales and independent reps and for estimating the cost to implement sales, marketing, promotional, and growth strategies.
