When it comes to our mindset, people fall into one of two predictable patterns: they learn to adopt either a growth mindset or a fixed mindset. – Carol S. Dweck, Ph.D. from Mindset: The New Psychology of Success. Dweck and colleagues have conducted research, featuring ethnically and economically diverse students, that shows that a central factor in this resilience is a student’s mindset about ability. In Dweck’s most famous experiment, students were given difficult or easy math problems. In Stanford psychology professor, Carol Dweck, described the essence of her growth mindset research: ‘Many students believe that intelligence is fixed, that...Stanford University psychology professor Carol Dweck and colleagues have conducted research, featuring ethnically and economically diverse students, that shows that a central factor in this resilience is a student’s mindset about ability.
